

ForTON

The Platform That Truly Works

Telegram Web-App Concept

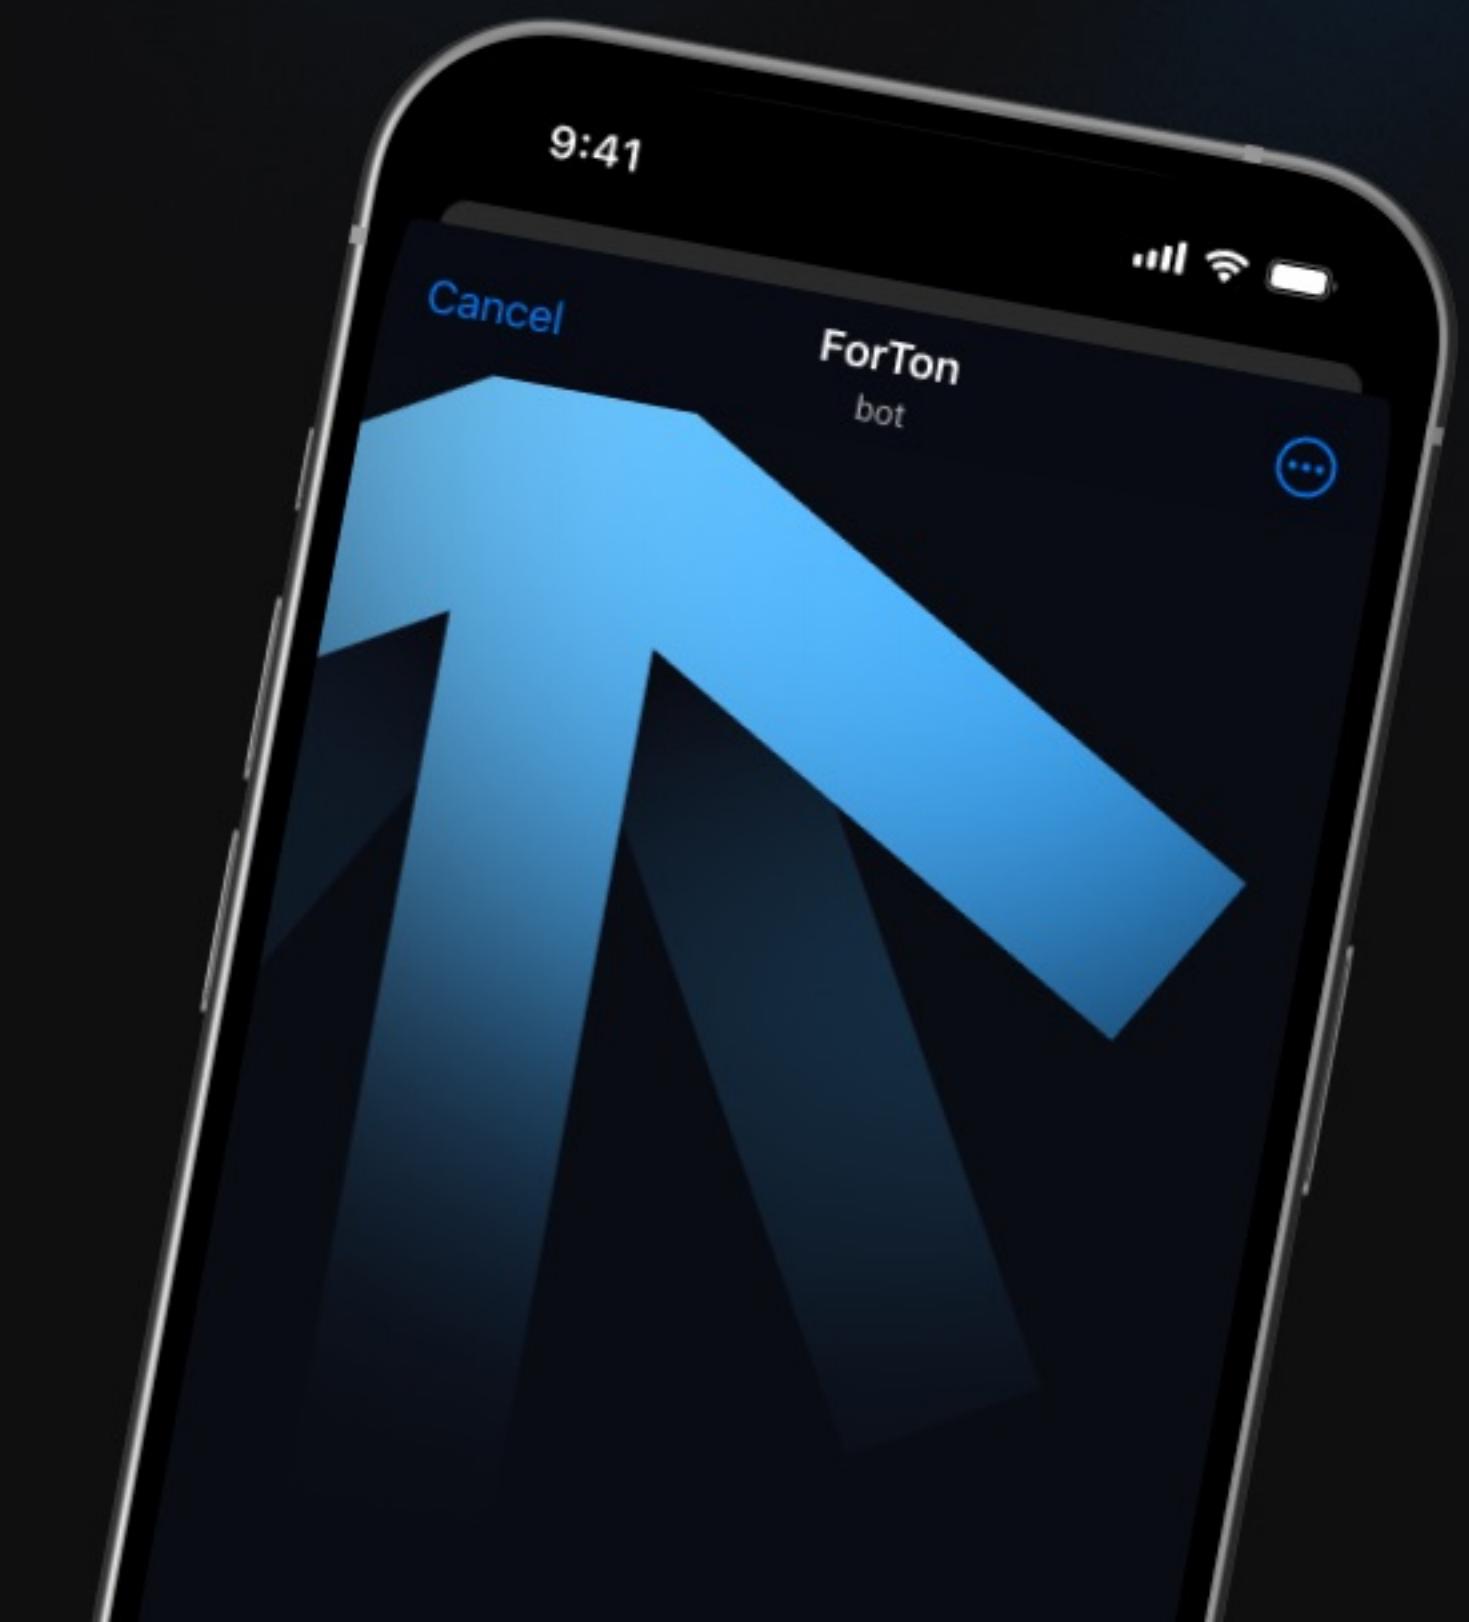

What is ForTON?

ForTon is the world's #1 networking platform built on the TON blockchain and deeply integrated with the Telegram ecosystem. The project operates through decentralized smart contracts — no admins, no manual management, and no room for scams

It is a multi-million strong community that builds strength from within:

- every participant influences growth
- every step is recorded on the blockchain
- every reward goes directly from person to person

What is ForTON?

ForTON works on a smart contract in the TON blockchain - everything is embedded in the code and no one can interfere

No control center, no head office

It's never too late to join ForTON

100% transparency and automation

This is a living ecosystem in the TON blockchain, where each participant is autonomous and decides for himself how and how much to earn

The platform proves every day that even a newbie who has just registered can earn tens of thousands of dollars in a matter of weeks or even days!

All income and movement of funds can be tracked in an open blockchain explorer

You are the master of your wallet and your destiny

Entering today could be the decision that changes your entire financial trajectory

How ForTON works

The core of ForTON is a fully automated smart contract on the TON blockchain. This means that all income accruals occur strictly according to the algorithm, automatically and directly between the participants

/001

No middlemen. No delays. No risk of human error

/002

The Base matrix program is built on the principle of profit distribution within a **6-seat matrix**

/003

You receive income from both **personally invited** and from **spillovers from above and below**, thanks to teamwork

/004

This gives even beginners a chance to earn money from the first day of participation

What makes ForTON sustainable and secure?

Can't change

the smart contract is already placed in the TON blockchain and cannot be edited

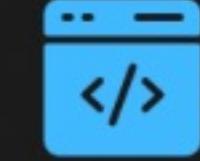

Clarity

all transactions can be tracked in the blockchain explorer - every step is open for verification

TON and Telegram

The Telegram Open Network is supported by thousands of nodes around the world, ensuring stability and scalability

Open source

anyone can study the source code of a smart contract. This is absolute transparency and trust at the architecture level

The ecosystem where the future is born

ForTON operates within one of the fastest-growing ecosystems in the world — Telegram and TON.

It is not just a messenger and a blockchain. It is an entire digital universe where millions of users, thousands of bots, payment solutions and decentralized applications are connected into a single, convenient and powerful infrastructure

Telegram

- Over 900 million users worldwide
- Built-in wallets, Web3 interfaces and instant crypto payments
- Bots, mini-apps, automation and ease of communication

Community, tools,
and transactions -
all in one place

The ecosystem where the future is born

TON is the future of Web3 happening right now

Why is this important for ForTON?

- The project was launched **where there are already people, traffic and trust**
- It uses a currency that is **integrated into Telegram** and instantly available to millions
- We are becoming part of a huge trend, rather than going against it

Thanks to TON, users can easily and quickly log into Web3 without any special knowledge: directly in Telegram, in a couple of clicks, without downloading wallets and complicated instructions

This is a revolution
in the accessibility
of decentralized
technologies

Ways to Earn with ForTON

In ForTON you earn in two ways:

One depends on your actions. The other - on your activity and position in the system.

Both are transparent, reliable and come directly to your wallet

Income from the matrix (Base program)

This is your base. You make profit from all the participants who occupy a place in your 6-place matrix. These participants can be:

-  Personally invited partners
-  Overflow from above
-  Overflow from below

As soon as a place in the matrix is occupied, the accrual occurs automatically

The more active your structure is, the higher your income

Ways to Earn with ForTON

In ForTON you earn in two ways:

One depends on your actions. The other - on your activity and position in the system.

Both are transparent, reliable and come directly to your wallet

Passive income for active participants

ForTON has a regular passive income system - **every 10 days** a fund is formed, which is distributed among **the TOP leaders of the project and all active participants**

Who gets the passive?

- TOP leaders (based on activity results)
- Squad (Group/Clans) Creators
- Active participants who have fulfilled at least one of the activity conditions

How ForTON BASE works

BASE Marketing is built on a 6-place matrix and operates via smart contract on the TON blockchain.
Income is accrued automatically when the matrix is filled, and all movements are recorded in the blockchain

Basic principles:

- **Your partners are always with you**

Invited partners are assigned to you forever through a smart contract and can occupy places on each level of your BASE matrix, bringing you profit with each repeated recycle

- **More levels — more income**

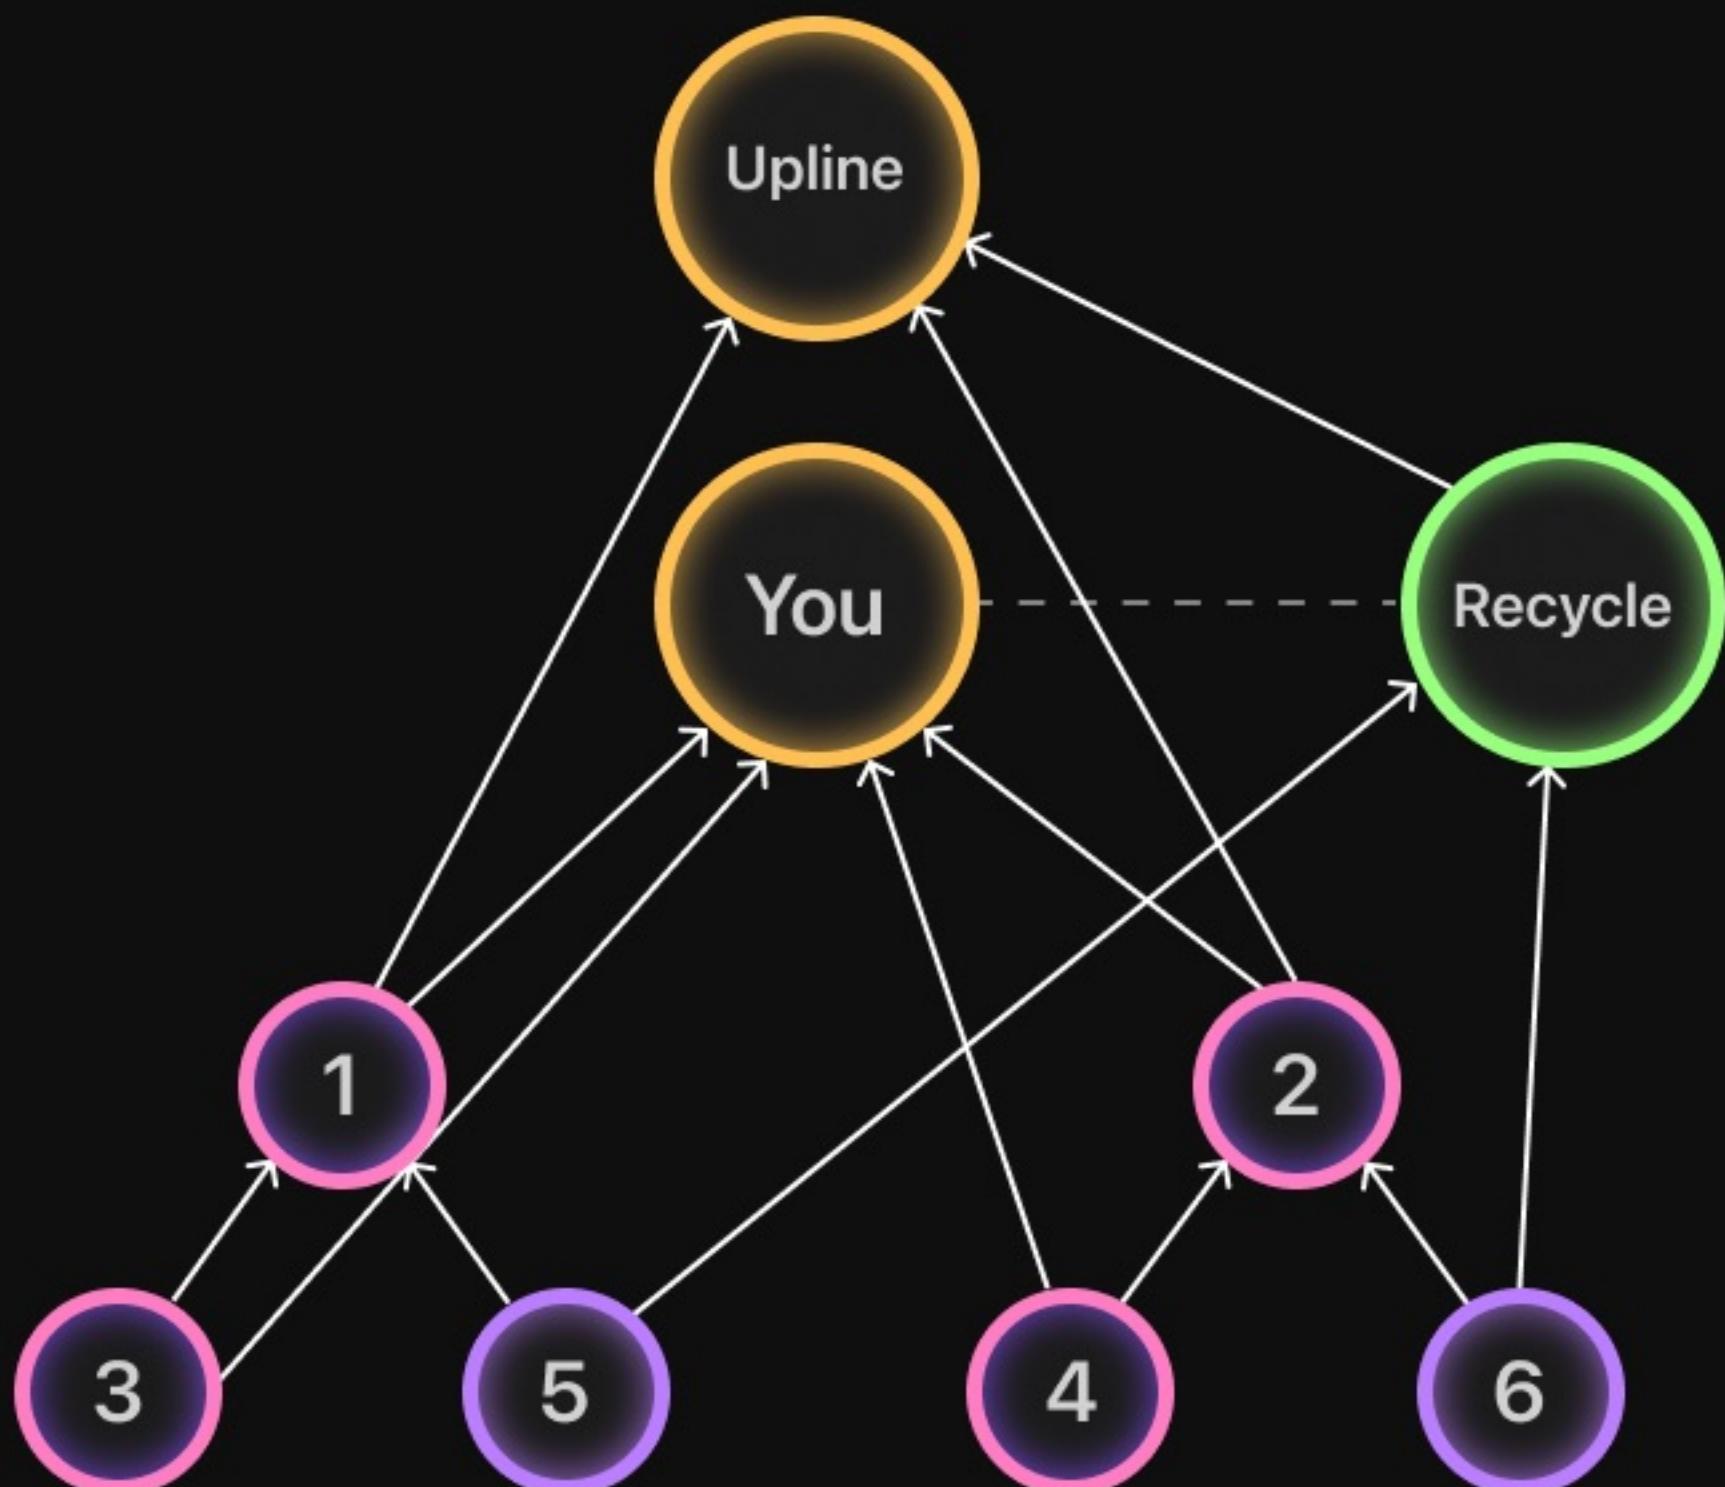

Income is generated from the level at which the partner occupies a place. The higher the level — the higher the profit

- **Automatic recycles without limits**

Each level restarts automatically after all 6 slots are filled. The number of cycles is unlimited

- **Activate once and go ahead**

Levels are purchased once and stay with you forever. You don't need to pay for them again

Build a team, earn income from each level and move up without limits

Levels in BASE

There are 12 levels available in the BASE program, and they all work on the same principle - the only difference is in the activation cost and the amount of income

What is important to know:

- One cycle = profit to move up
Income from one full level cycle allows you to activate the next level without additional investments
- More levels = higher income
By inviting partners to several levels at once, you speed up your profits several times
- No time limit
Each activated level works constantly and brings income from each cycle
- Activate as many as you want
You can activate several levels at once, up to all 12
- Open in order
You can't activate, for example, the 4th level without opening the 3rd one

Caution: overtaking!

If your partner activates a level before you, and you haven't bought it, the payment will pass you by. To avoid losing profit, keep levels open on time

The best strategy

activate as many levels as possible at the start and teach your partners to do the same

Passive income ForTON

In ForTON, a passive income fund is created every 10 days and distributed among active participants, top leaders, and squad creators

How is the fund formed?

With each level activation, +25% is retained, which replenishes the passive income fund

This fund goes back into the community - to those who move the project forward

Who Receives Passive Income?

✓ Top 100 Active Participants

✓ Squad Creators

^ Participants who have fulfilled any of the conditions within the last 10 days:

- Received at least one profit accrual under the BASE program
- Invited at least one partner
- Made at least one upgrade in BASE

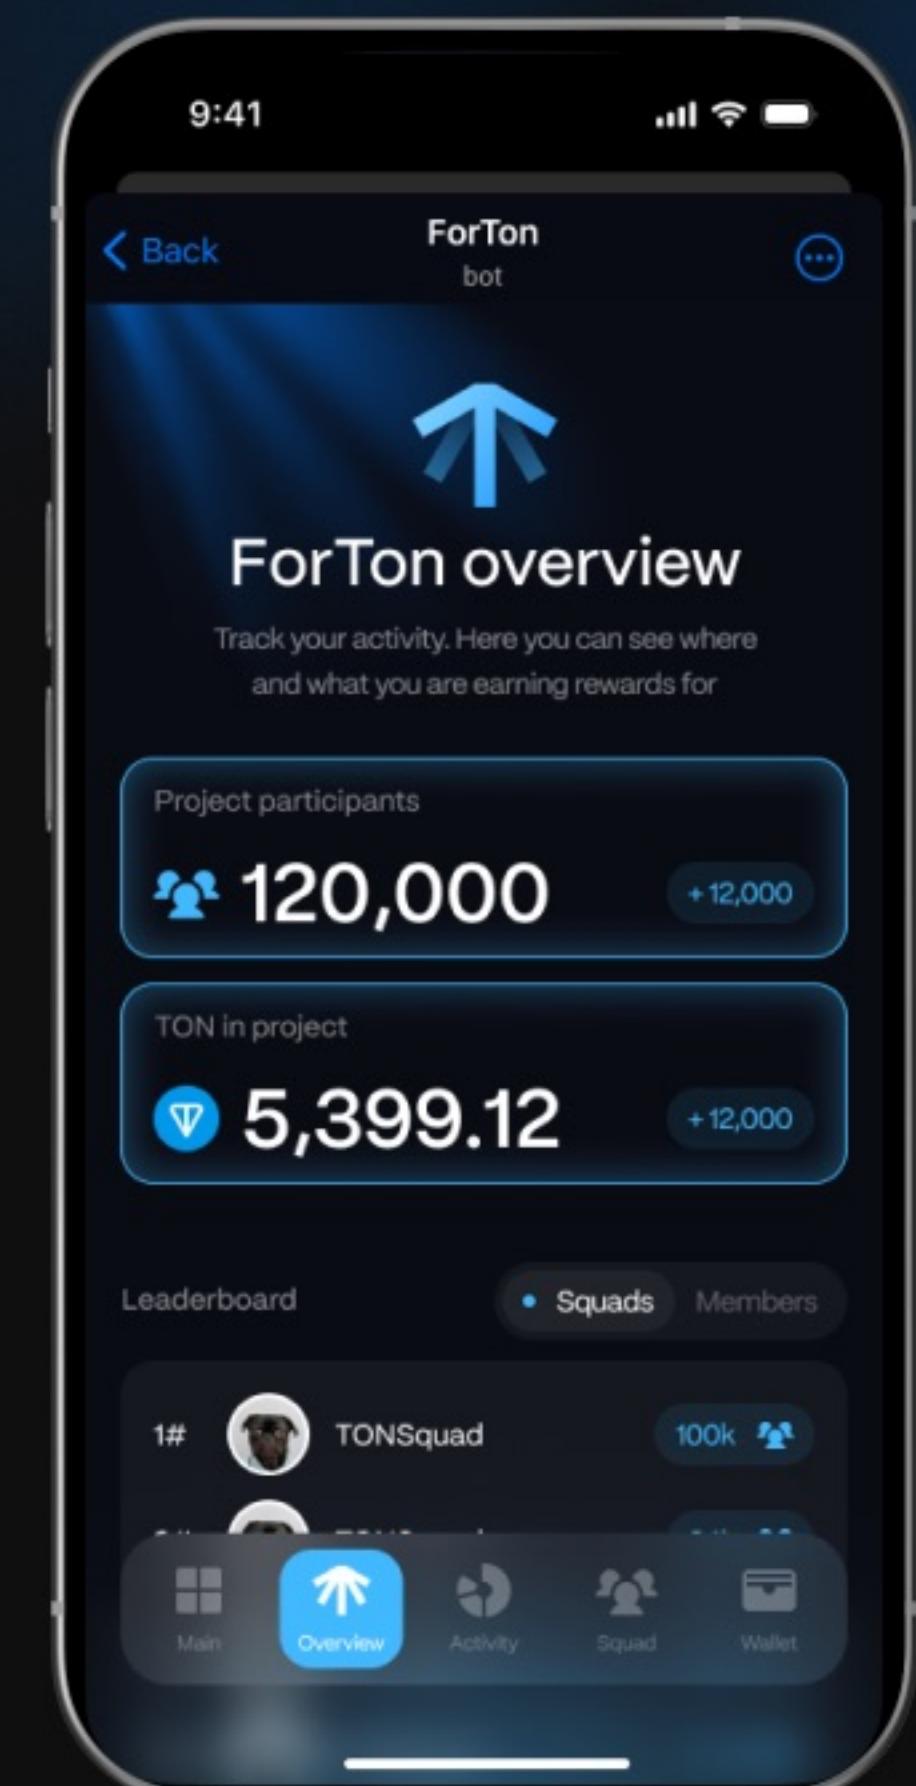

Passive income ForTON

Important addition!

- ▼ If you have already **received x2 or more from your investments in ForTON**, you **temporarily skip** participating in the passive
- ▼ To return, you just need to increase your participation (upgrade your level)
- ▼ This mechanism prevents the fund from falling asleep and stimulates constant growth

- Passive in ForTON is a **reward for activity**, not randomness. Be on the move — and get paid every 10 days

Freezing, lost and additional profit

In ForTON, it is important to activate levels in a timely manner, otherwise you can miss out on profits or, conversely, receive additional bonuses

Lost Profit

You lose profit if:

- The partner overtakes you - activates the level before you. In this case, the payment goes to the superior, who already has this level active
- The level is frozen, and new partners continue to enter - profit is again passing you by

Freeze level

A level is considered frozen if:

- all 6 places on it are occupied (the cycle is completed), but the next level is not activated

What's happening:

- Partners continue to occupy positions, but the profits from this level are temporarily redirected to your superior
- You miss out on income until you unlock the next level

Additional benefit (gifts)

You can receive payments from the depths if:

- your partners below have overtaken, and you are the first at the top who has the required level active

Such "gifts" from deep within the structure can bring solid bonuses – simply for being one step ahead

Overflows - income from above and below

Spillovers are a mechanism by which you can receive partners (and income from them) even if you did not personally invite them. This happens when places in your matrix are occupied by participants invited by others - your upline or downline partners

Overflow from above

- Your upline invites a new member, who takes the empty spot in your first line
- You receive income from other people's activity, even if you did not invite anyone yourself

Overflow from below

- Your personally invited partner or the partner received from the overflow from above invites his people
- They occupy the second line of your matrix - and bring you income, although you are not even familiar with them

The bottom spill is a reward for inviting an active partner or catching the spill

Overflows - income from above and below

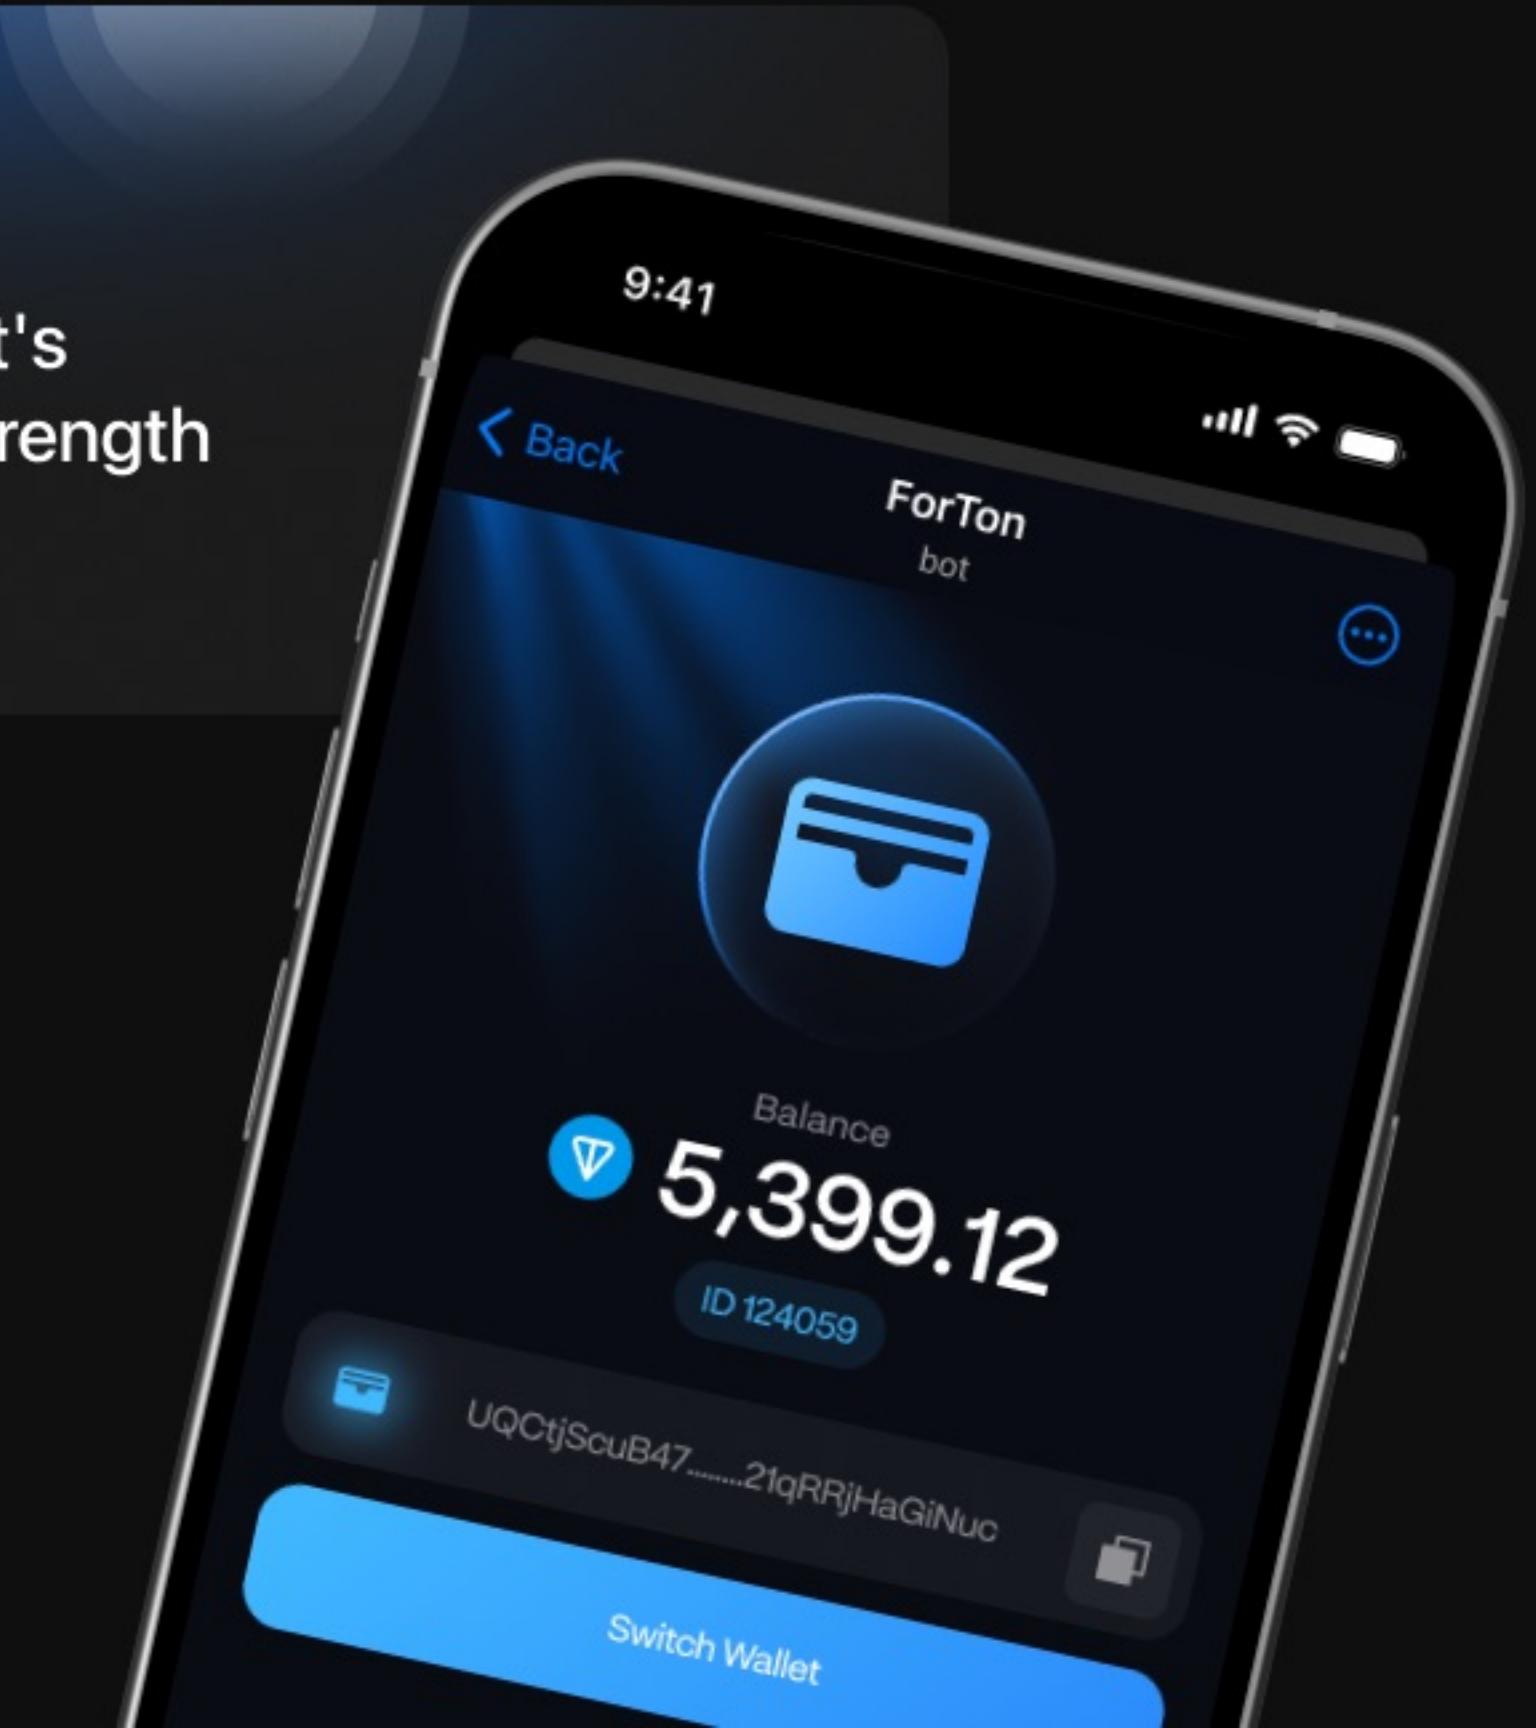

In ForTON you can earn not only due to your efforts, but also due to the movement of the whole team. From above and from below

Important to know:

- Passive members can earn money if they join an active team
- Overflows are possible at all levels, but are not required

Overflows

it's a matter of chance and it's better to rely on your own strength and build an effective team

Squads - the power of team play

Squad is a team of ForTON participants who develop together, help each other and receive additional bonuses from the system. This is not just a "chat by interests" - it is an internal structure where support, synergy and forward movement are important

Why do we need squads?

- Simplified start for beginners
- Collective support and training
- Common goal and team growth

Bonuses for squad creators

- By creating your own squad, you become its leader and receive:**
- Priority in the distribution of passive income
 - Additional visibility in the system
 - Strengthening team activity
 - A unique role and reputation within the community

Important Features

- Squads are formed freely - any active participant can create their own
- Within the squad there is its own team culture, mini-hierarchy and dynamics
- The system encourages **squad growth** - more members = more power

Alone, you're fast. In a team, you're unstoppable

Where to Start?

Your journey to earning with ForTon begins with a few simple steps

Prepare your TON wallet

Step 1

Register a wallet in Telegram via @wallet or use the official TON Keeper. Top up your balance with an amount sufficient to activate levels (recommended from 4 levels for a quick start)

Register in ForTON

Step 2

Follow the partner's referral link and activate the starting level in the BASE program. From this moment you are in the system - your matrix is ready to be filled.

Invite your first partners

Step 3

Recommended model for starting: 4 personal invitations = quick start. The sooner they come in, the more chances for spillovers, team growth and participation in passive income

The sooner you start, the closer you are to your first income

ForTON is a system that works for you from day one
